

The overuse of Zinc and Formaldehyde in animal footbaths is hazardous to human health and the environment.

Healthy Hooves Eco™ is a safe acid solution that solubilises Zinc, with additional additives to assist in cleansing of the hooves and can be used in animal footbaths.

Healthy Hooves Eco™ contains a buffering system that provides a consistently effective footbath life under extreme conditions of contamination, whilst remaining effective for several days.

Farms are now using **Healthy Hooves®** (safe acid solution) with equally outstanding results. The number of farms is growing daily with over 500,000 animals walking through a footbath containing **Healthy Hooves®**.

Healthy Hooves **ECO**™

Solutions for Footbaths

Direction for use

For Pened and walkthrough application:

Initial Use:

Use **Healthy Hooves Eco™** @ 4% with 1% zinc sulphate, footbath for 4 consecutive days.

Ongoing Use:

Use **Healthy Hooves Eco™** @ 2% with 1% Zinc Sulphate, footbath as required.

For spray application:

Use **Healthy Hooves Eco™** @ 4% with 1% Zinc Sulphate. Apply daily as required.

Also Suitable for Cattle

For use in cattle footbath:

Dairy application, footbath 2 times per day 3 days per week (300-400 cow passes using a 200 litre footbath).

Beef cattle, footbath as required.

Reduce the cost of Hoof Care

Benefits

- Fast acting
- Long lasting
- Reduces Zinc sulphate usage
- Easy to use
- Lowers pH of footbath solution
- Activates Zinc to be effective against bacteria
- Contains antiseptic and cleaning properties
